My name is Kshitij Bhavsar. I am currently studying in my third year of CS Engineering at jspm imperial college of engineering. I've always been passionate about tech and related fields. Due to my keen interest, I acquire skills in coding and tech. I am Learning Web development and UI/UX. I have participate in several Hackathons my role as a Frontend developer, UI/UX Designer and Team manager. I have also work on Projects of Blockchain and web3 and AI ML.

Projects

● Web Cloned (Web application)

- I several types of web clone such as Spotify clone ,My own Crome type browser, online lecture facility like zoom call, attendance marking system using face detection and other features
- these project was made in such a way that user will get the seamless experience and it will be easy to track the attendance and monitor the student growth record.

● Healthcare Project (Android Application)

- Me and my team created these application called Healthcare5, which there are were features like disease detection using the device camera and recommend the cure base on the correct detection, it was a informative application which was meant to be use by all type of users
